Profile

Software Engineer passionate about learning. Worked in a professional environment [within various roles] since 2019, but I've been coding and learning since I was 10. I am a team player - collaboration is second-nature to me. I can also really thrive under a solid team-lead who is willing to provide a direction for me to go.

I've worked on IoT, B2B ERP, and now Payments, but I'm really looking to change it up again and expand my horizons.

Employment History

Application/backend Programmer (Werkstudent), Marley Spoon, Berlin
OCTOBER 2022 — PRESENT

- TS: Ruby, Rails, Sidekiq, GraphQL, Postgres, Coffeescript/Javascript, Kubernetes
- Worked with my team on the payments API of the new-customer experience in the web funnel
- Became the team-wide and (possibly company-wide) go-to-guy for the invoicing system
- Added direct metrics for new indebted customers, along with backfilling relevant data for old customers using database migrations
- Added features for customers and customer service staff, including some front-end work

Embedded/IoT Software Engineer (Werkstudent and full-time), Envio Systems, Berlin
SEPTEMBER 2021 — JUNE 2022

- TS: Python, C
- Worked on a small team developing and adding new features to one of Envio's main products (backend API), creating massive value
- Created a seamless product experience by closely collaborating with the hardware team in properly integrating and testing our product with theirs
- Rapidly acquired knowledge on sensor protocols in order to properly add them into the product

Software Engineer Intern, Sirum GmbH, Hamburg, Germany
JUNE 2019 — AUGUST 2019

Photographers Assistant, KISS ME IN PARIS, Paris, Ile-de-France, France
JUNE 2017 — AUGUST 2018

Education

B.S. Computer Science, Jacobs University, Bremen
AUGUST 2018 — PRESENT

High School, MAST@FIU, Miami
AUGUST 2014 — JUNE 2018
